### NOTICE OF FILING AND REQUEST FOR COMMENTS

D.P.U. 22-98

August 19, 2022

Petition of Liberty Utilities (New England Natural Gas Company) Corp. d/b/a Liberty for approval of its Revenue Decoupling Adjustment Factors for the 2022 Peak Period, November 1, 2022, through April 30, 2023.

---

On August 3, 2022, Liberty Utilities (New England Natural Gas Company) Corp. d/b/a Liberty (“Company”) filed a petition with the Department of Public Utilities (“Department”) for approval of its revenue decoupling adjustment factors (“RDAFs”), for effect November 1, 2022. This filing was made pursuant to Liberty Utilities (New England Natural Gas Company) Corp., D.P.U. 15-75 (2016), and the Company’s revenue decoupling adjustment clause (“RDAC”) tariff, M.D.P.U. No. 1025H. In 2008, the Department developed revenue decoupling by establishing a mechanism through the RDAC that allows the Company to modify, on a semi-annual basis, its base distribution rates as a result of changes in customer usage. Revenue decoupling severs the link between sales and revenues, and instead provides gas and electric utility companies with a target revenue level, thus removing the disincentive of implementation of energy efficiency and demand reduction programs that encourage customers to lower energy usage and demand. See generally Revenue Decoupling, D.P.U. 07-50-A (2008); see also NSTAR Gas Company, D.P.U. 14-150, at 22-23 (2015). The Department has docketed this petition as D.P.U. 22-98.

The Company proposes RDAF charges of \$0.0389 per therm for residential customers, \$0.0301 per therm for commercial and industrial (“C&I”) low load factor customers, and \$0.0274 per therm for C&I high load factor customers, effective November 1, 2022 through April 30, 2023. As a result of the proposed changes to the RDAF, the average Fall River/North Attleboro residential heating customer (customer class R-3) using on average 122 therms per month during the peak period will experience a bill increase of \$0.09 or 0.03 percent as compared to the previously effective peak period RDAF. The average Blackstone residential heating customer using an average of 117 therms per month during the peak period will experience a bill increase of \$0.08 or 0.03 percent as compared to the previously effective peak period RDAF. The Company states that the average monthly bill impact for all rate classes at each class’s average use during the peak period will range from a decrease of (0.09) percent to an increase of 0.09 percent as compared to the previously effective peak period RDAF. For specific bill impacts, please contact the Company as shown below.
