We're Extreme Weather Ready You Can Be, Too

Liberty works throughout the year to prepare for extreme weather. From inspecting and maintaining our gas lines and weatherizing our equipment to training our teams, we are ready to respond 24/7 to help keep service safe and reliable.

Are you ready? Use our extreme weather preparation checklist to help you and your loved ones prepare.

Follow us on social media to see all that goes in to providing you with reliable natural gas service.

Smell Gas? Here's What to Do

The smell of leaking natural gas is often compared to rotten eggs. If you smell something resembling this, exit your property immediately. When you arrive at a safe spot, **call us at 508-883-9516 or call 911**. If you smell gas, DO NOT use electrical switches, appliances, garage door openers, etc.

This can cause sparks. Instruct others to leave and evacuate the premises immediately. For more important safety information regarding natural gas and ways to identify a gas leak, visit www.libertyenergyandwater.com.

Monthly Maintenance Check Your Batteries

Please take the time to test smoke and carbon monoxide detectors monthly. Batteries should be replaced every six months. These two devices can save your life in the event of a fire or a buildup of carbon monoxide (CO), an odorless, colorless gas formed by the incomplete combustion of fuels.

Construction Notice Improvements Ahead

We are committed to proving our customers with the safest and most reliable service available. In order to do this, we must perform annual maintenance and upgrades on our underground natural gas distribution system. In 2023, Liberty expects to complete approximately 15 miles of main work starting in early March. Follow us on social media for more information about our construction work. www.facebook.com/LibertyMassachusettsGas/
